

QA engineer

📍 Bangalore ■ Full time ⌚ 3-5 yrs

We are looking for a Quality Assurance (QA) engineer to develop and execute exploratory and automated tests to ensure product quality.

QA engineer responsibilities include designing and implementing tests, debugging and defining corrective actions. You will also review system requirements and track quality assurance metrics.

The QA technician role plays an important part in our company's product development process. Our ideal candidate will be responsible for conducting tests before product launches to ensure software runs smoothly and meets client needs, while being cost-effective. If you hold an engineering background and enjoy providing end-to-end solutions to software quality problems, we'd like to meet you.

Ultimately, you should monitor all stages of software development to identify and resolve system malfunctions to meet quality standards.

who we are

Betterplace is a technology platform designed to hire, manage, and engage the blue-collar workforce with ease with our all-in-one lifecycle platform. Designed for large enterprises, the platform enables you to manage end to end lifecycle of your blue-collar employees. Device – agnostic. Customizable. Scalable. Uniquely digital.

what we're looking for

- At least 3 yrs of experience in manual and automation testing
- Good knowledge and hands on experience with database systems (SQL etc.)
- Experience with REST API automation
- Experience with using one or more automation tools such as Selenium (Functional, Regression, API) and Protractor.
- Experience in Automation Frameworks (Data Driven, Keyword Drive, Hybrid, POM etc.)
- Solid experience in the automation of web based applications in Selenium RC using Java and TestNG
- Mobile Automation experience using Appium.
- Experience in transforming use cases into performance scripts using industry standard tools such as LoadRunner, JMeter and Gatling is a plus.
- Experience with using virtual environments, source control, remote development, issue tracking, product build and installation (CI/CD).
- Team player, agile, flexible, multi-tasking, passion for learning new areas
- Excellent analytics, problem-solving and debugging skills
- You love and have a deep understanding of QA
- You understand the uses and methods of testing

what you'll get

- Health Benefits
- Innovation-driven culture
- Smart and fun team to work with
- Friends for life 😊
