

senior software engineer

node js

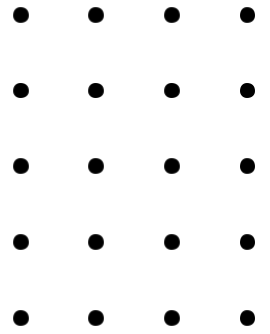

📍 Bangalore 🏢 Full time 🕒 3-6 years

We are looking for a Node.js Developer responsible for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

who we are

Betterplace is a technology platform designed to hire, manage, and engage the blue-collar workforce with ease with our all-in-one lifecycle platform. Designed for large enterprises, the platform enables you to manage end to end lifecycle of your blue-collar employees. Device – agnostic. Customizable. Scalable. Uniquely digital.

what we're looking for

- Strong proficiency with JavaScript.
- Knowledge of Node.js and Express framework.
- Understanding the nature of asynchronous programming and its quirks and workarounds.
- Good understanding of server-side templating languages (Jade, EJS, etc)
- Good understanding of server-side CSS pre-processors (Stylus, Less, etc)
- User authentication and authorization between multiple systems, servers, and environments.
- Integration of multiple data sources and databases into one system.
- Understanding fundamental design principles behind a scalable application.
- Creating database schemas that represent and support business processes.
- Implementing automated testing platforms and unit tests.
- Proficient understanding of code versioning tools, preferably Git.
- Prior experience with Elastic search is preferred.
- Prior experience with Kafka is preferred.

what you'll do

- Integration of user-facing elements developed by front-end developers with server side logic
- Writing reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performant applications
- Integration of data storage solutions; working knowledge of relational and NoSql databases

what you'll get

- Health Benefits
- Innovation-driven culture
- Smart and fun team to work with
- Friends for life
